Progression

National 4/5 Health & Food Technology can progress up to Higher (recognized as a science at some Universities) then to AH ☆☆

Advanced Higher

5

"AH HFT offers a lot of independence and freedom in both your project and the content you learn in the buildup to your exam. If you're continuing from Higher, it's a great opportunity to build on your knowledge while making the assignment completely your own as you take on an exciting project related to a food issue you find most interesting. There is a wide range of knowledge to gain as you learn about nutrition in relation to your own life and others in Food For Health; you then see things on a wider-world scale learning about Contemporary Food Issues; and finally, you go behind the scenes to learn about the process behind food in Food Product Development. In AH HFT, you're able to work at your own pace and set deadlines that suit you, and although there is a strong emphasis on self-study, your teachers are always happy to help!"

Wendy is studying to be a doctor, her thoughts on AH ♥
