Introduction

This booklet is designed to help you and your child make informed choices about the courses your child will study in S3 and beyond. The booklet should be used in conjunction with the S2 Progress Report issued at the beginning of March 2023 and advice at the Parents' Consultation evening.

At Boroughmuir High School, we pride ourselves on working to meet the needs of all our pupils. We do this by providing the highest quality education and support at a level appropriate to pupils' needs to allow them to make successful progression through school and into positive destinations beyond.

We look forward to working with you and your child in this course choice process.

David Dempster, Head Teacher

BOROUGHMUIR HIGH SCHOOL

Our Vision

To ensure a confident, nurturing & inclusive learning community where ALL achieve their true potential & embrace life's challenges.

Aims

- Provide a welcoming, safe & supportive environment
- To respect, listen & value contributions of all
- To challenge & stimulate
- To promote a culture of achievement, attainment & continuous improvement
- Share high expectations in a nurturing environment
- Celebrate success, diversity & promote equality & fairness
- To imbue the values of tenacity & perseverance
- Promote creativity & enterprise
- To promote individual & collective responsibility & contribute positively to the wider community

Important Dates	Timeline Summary
w/b Jan. 9 th	Course choice booklet and website login details issued to pupils. Indicative course choices due by 19.2.23 https://www.studentoptions.co/S2-BOR/
25.1.23 (Wed)	S2 Parents' Course Choice Information Evening and subject MarketPlace event
19.2.23 (Sun)	Indicative course choices due. Further changes can be made until 10.3.23 via coursechoice@boroughmuir.edin.sch.uk
w/b 6.3.23	S2 report issued
9.3.23 (Thur)	S2 Parents' Consultation Evening
10.3.23 (Fri)	Final date for course choice changes
w/b June 5 th	New S3 timetable (to be confirmed)

Curriculum for Excellence (CfE)

Curriculum for Excellence sets out clear strategies to improve the quality of teaching and learning in Scottish schools including

- Learning is an active process with clear learner experiences and outcomes
- Pupils experience a broad general education in the junior phase (S1-3) of high school
- Key skills of literacy, numeracy and health and wellbeing are addressed by all teachers across all subjects throughout a pupil's time at school
- 'Joined-up' and relevant learning is further promoted through interdisciplinary learning between departments
- Pupil personalisation and choice in the learning process is a main driver in raising pupil motivation and attainment

Curriculum for Excellence – Stages

Curriculum for Excellence levels equate to the stages below:

Working Levels	Stage
Second Level	By the end of P7
Third Level	By the end of S2
Fourth Level (SQA National 4)	By the end of S4 (pupils will work towards achieving either of these levels by the end of S4)
SQA National 5	

In S3 and S4 subjects are taught based on experiences and outcomes (E&Os) and SQA National Qualifications (National 4 and 5)

The CfE Working Levels shown below have been set by teachers based on course coverage and is related to how much of the course has been covered. This will vary from subject to subject.

Working Level			
2	W	Working within Level 2	A few of the E&Os achieved at Level 2
	P	Progressing within level 2	Around half of the of E&Os achieved at Level 2
3	W	<i>Working within Level 3</i>	<i>A few of the E&Os achieved at Level 3</i>
	P	<i>Progressing within level 3</i>	<i>Around half of the of E&Os achieved at Level 3</i>
4	W	Working within Level 4	A few of the E&Os achieved at Level 4
	P	Progressing within Level 4	Around half of the of E&Os achieved at Level 4

Progress judgements are based on formative and summative evidence of learning within each subject and indicates how well your child is progressing at the CfE Level indicated.

	Level	Progress	Effort	Homework	Behaviour
Exceeding Expectations	1	Coping well with course, making good progress overall	Highly engaged, conscientious and consistent	Always makes a very good attempt	Behaves very well at all times in class
Meeting Expectations	2	Coping with course, making progress as expected	Engaged in learning, effort is consistently good	Makes a good attempt	Behaves well in classes
Requires Improvement	3	Requires some improvements to meet course demands, some gaps in knowledge, understanding and skills Use NSIs for improvement	Not always engaged and effort is inconsistent	Inconsistent when completing homework	Inconsistent behaviour and some improvements required
Cause for Concern	4	Not coping with course demands	Pupil is not engaged , and effort is minimal	Rarely makes a good attempt	Serious concerns with behaviour

Curriculum for Excellence – Personalisation and Choice

Throughout the 'S3 Personalisation and Choice' process, care is taken to meet individual needs with a view to providing opportunities for personal progression and achievement. Where appropriate, the number of courses may be reduced in discussion with parents/carers. Alternative assessment arrangements will be made for pupils with specific additional support needs.

We believe that S3 should, for most of our pupils, be the bridge between the junior and senior phase.

- Study within Curriculum for Excellence third and fourth levels will lead into, when and if appropriate, study within the National Qualifications Framework of National 3/National 4/National 5.
- All pupils will be studying within the National Qualifications Framework by the end of S3 and will be assessed at an appropriate level at the end of S4.
- Studying subjects over two years provides time and opportunities to enhance learning, engage in meaningful interdisciplinary work and address the areas of Literacy, Numeracy and Health and Wellbeing.

National Qualification Equivalences

SCQF level (Scottish Credit & Qualifications Framework)	Qualifications	Qualification Grading
3	National 3	Pass/Fail
4	National 4	Pass/Fail
5	National 5 (exam)	A/B/C/D or No Award

CHOICE PROCESS – SUPPORT FOR PUPILS 2023

Between January and March, all S2 pupils are supported in the course choice process. Support for Pupils staff provide information and advice on making the most appropriate course choice. This is delivered through our Personal and Social Education Programme (PSE). It is important when making a choice of courses that career options, ability and interests are considered. Care should be taken to keep options open by having a broad, balanced and coherent programme of courses.

An in-school S2 Parents' Information Evening together with the S2 Marketplace event will be held on Wednesday 25th January 2023. This will provide further subject information and pathways.

We will be providing a written S2 school report and an **on-line subject Parent Consultation evening on Thursday 9th March 2023.**

Careers Support for S2 pupils

Our Careers Adviser is Cara Davidson Cara.Davidson@sds.co.uk. She will speak to pupils via PSE lessons. Pupil Support Leaders (Guidance Team) will support course choice for their PSE groups. Further help can be gained through attendance at the Careers Club, held on Tuesday Lunchtimes in the school Library. This is led by the Careers Advisor and our Developing the Young Workforce coordinator.

Skills Development Scotland and My World of Work

Skills Development Scotland (SDS) is the national skills body supporting the people and businesses of Scotland to develop and apply their skills. SDS's role in school is to provide careers support to the pupils to ensure every one of them is working towards a positive post school destination.

SDS offers a session to all S2, S4, S5 and S6 pupils during PSE lessons offering advice that supports their decision-making dependant on their stage. Intensive one to one career coaching sessions are offered to students in the upper school by the school careers coach, who is also available in school and pupils can request an appointment via their PSE teacher.

www.myworldofwork.co.uk offers advice and support for pupils, teachers and parents. Please take time to look at this. All S2 pupils have been given the opportunity to familiarise themselves and access MyWOW

National Progression Awards (NPA) Scottish Credit and Qualifications Framework ([SCQF](#))

In S3/4 some pupils will target SCQF Level 4 courses and there are a number of SQA qualifications available. We offer SCQF National 4 and NPA Level 4 courses in some subjects. These are equivalent levels of qualifications.

In S5/6 we have similar equivalent National 5 and NPA Level 5 courses.

The SCQF is a way of comparing Scottish qualifications and helps to show how qualifications relate to each other and to other forms of learning.

Each qualification has a level and a number of credit points. The level of qualification shows how difficult the learning is. The credit points show how much time it takes to achieve the qualification.

The SCQF supports the development of progression routes between qualifications.

SCQF Levels	SQA Qualifications			Qualifications of Higher Education Institutions	Apprenticeships & SVQs
12				Doctoral Degree	Professional Apprenticeship
11				Masters Degree, Integrated Masters Degree, Post Graduate Diploma, Post Graduate Certificate	Graduate Apprenticeship Professional Apprenticeship SVQ
10				Honours Degree, Graduate Diploma, Graduate Certificate	Graduate Apprenticeship Professional Apprenticeship
9				Bachelors / Ordinary Degree, Graduate Diploma, Graduate Certificate	Graduate Apprenticeship Technical Apprenticeship SVQ
8		Higher National Diploma		Diploma Of Higher Education	Higher Apprenticeship Technical Apprenticeship SVQ
7	Advanced Higher, Awards, Scottish Baccalaureate	Higher National Certificate		Certificate Of Higher Education	Modern Apprenticeship SVQ
6	Higher, Awards, Skills for Work Higher				Modern Apprenticeship Foundation Apprenticeship SVQ
5	National 5, Awards, Skills for Work National 5				Modern Apprenticeship SVQ
4	National 4, Awards, Skills for Work National 4	National Certificate	National Progression Award		SVQ
3	National 3, Awards, Skills for Work National 3				
2	National 2, Awards				
1	National 1, Awards				

S3/4 PERSONALISATION & CHOICE SHEET 2023

Pupils will target gaining up to 8 subject qualifications by the end of S4. Some choices are grouped together based on curricular areas. S3 also take courses in PSE, PE and a rota of Health and Wellbeing (HWB) activities.

- Pupils must make choices from each area A-H
- Courses will not run unless there are viable numbers
- In the event of courses being over-subscribed, places are allocated based on choice preference order where possible.

Choice	Curricular Area	Subjects Available	
A	English	All pupils study <i>English</i>	
B	Mathematics	All pupils study <i>Maths</i>	
C	Modern Languages	Pupils will choose either to: a) Continue with their current (S2) Modern Language: <i>French, German or Mandarin</i> or b) Choose <i>Modern Languages for Life and Work (Levels 3/4)</i>	
D	Social Studies	Choose one from the following: Geography History Modern Studies RMPS Economics (<i>National 5 only</i>)	
E	Sciences	Choose one from the following: Biology Chemistry Physics Science* (<i>National 3/4</i>) *Only pupils advised should choose this option	
F-H	Expressive Arts HWB Modern languages Sciences Social Studies Technologies Religious & Moral Education	Choose three subjects in preference order: Administration and IT Art & Design Biology Business Management Computing Science Chemistry Drama Design & Manufacture Engineering Science Economics Geography Graphic Communication History	Health & Food Technology (HFT) History Media Studies Modern Studies Music Music Technology Physical Education Physics Practical Cookery Practical Woodwork RMPS Spanish
Reserve choices (R & S)	Choose two further subjects	Choose two reserve subjects in preference order. - The first reserve subject + R - The second reserve subject = S	

S2 and beyond

By the end of S2, most pupils will have achieved the Experiences and Outcomes of Curriculum for Excellence at third level and some may have embarked on fourth level.

In S3, learners will continue to build on their S2 experiences by progressing through any remaining CfE 3rd level outcomes and engage with work at fourth level and National 5 course content. latest.

By the end of S4, appropriate to their level of attainment, many pupils will be presented for National 5 examinations in the subjects they have studied in S3 and S4; others will be assessed at National 4 level and a number may be presented at National 3 level.

Possible progression routes are illustrated in the following table. The final level is not decided until late in S4.

S2	Progress	S3	S4	S5	S6		Career Destinations
3W		Third level/ Fourth 4	National 3/ National 4	National 4	National 5	→	Training/Employment/ Further Education
3P	Inconsistent Needs Improvement	Fourth level/ National 4	National 4	National 5	Higher	→	Higher Education/ Further Education/ Training/ Employment
3P	Good Excellent Inconsistent	Fourth level/ National 4	National 5	Higher	Advanced Higher	→	Higher Education/ Further Education/ Training/ Employment
4W		Fourth level/ National 4	National 5	Higher	Advanced Higher	→	Higher Education/ Further Education/ Training/ Employment

Employability Focussed Courses

Over the last two years we have been developing two courses to provide more vocational skills focused opportunities for a limited number of S3 and S4 pupils.

These are currently being delivered alongside the Science & Health NPA Level 4 Course. We will be inviting participants for these course and we hope to be able to widen these opportunities over the coming years.

The Prince's Trust Awards - Personal Development and Employability Skills

The Prince's Trust was founded by the then HRH Prince of Wales in 1976 and has helped more than one million young people.

The Prince's Trust qualifications in Personal Development and Employability Skills recognise a breadth of personal skills, qualities and attitudes required by employers across a range of sectors. They have been developed with the aim of progressing learners into further education and/or employment.

Working with a Prince's Trust Business Mentor, learners have the opportunity to:

- Develop their own personal growth and engagement in, and through, learning
- Engage in learning that is relevant to them and support their development of personal skills and attributes that are essential for working life and employment
- Prepare themselves for progression into further education programmes, apprenticeships or other work-based learning
- Develop their English and mathematics skills within a practical, relevant context

SQA – Barrista Skills

This SCQF Level 5 course is currently delivered alongside The Prince's Trust Award

Achievement of this Award is nationally recognised and Boroughmuir High School is one of the few schools accredited to deliver this qualification.

The Award in Barista Skills at SCQF level 5 will develop the knowledge, understanding and technical skills required for the role of a barista.

This qualification covers areas such as the different types of coffees and other beverages typically served by a barista. Setting up, operating, cleaning and closing down specialist equipment is also covered. Learners will have the opportunity to apply their knowledge and skills by preparing and serving different hot and cold beverages.

LEVELS

LITERACY & LANGUAGE
ENGLISH
NATIONAL 3, 4 AND 5

S3/S4 Course Content	Assessment
<p>Course Information</p> <p>The purpose of the English courses in S3 and S4 is to continue to develop and enhance the skills of communication in all its forms through listening, reading, writing and talking. Pupils will engage with a wide variety of texts and media formats to work towards either National 4 English, including the Literacy unit, or National 5. Pupils who successfully achieve N5 A or B by S4 can go on to Higher English in S5. Those who attain N4 by the end of S4 may go on to study at N5 level in S5.</p> <p>The courses are divided into two main units, the skills of which are taught at the same time</p> <ul style="list-style-type: none"> • Analysis and Evaluation – listening and reading • Creation and Production – talking and writing <p>National 4 also includes an integrated Literacy unit. Pupils taking English at these levels will find a wide variety of challenging and relevant texts ranging from classics and Shakespeare to modern novels, plays, graphic novels and multi-modal texts. Pupils will study the role of communication in society while extending their own skills in writing and reading to show their ability to understand, analyse and evaluate an unseen text and to apply language skills to chosen tasks. Accuracy in the core skills of spelling, punctuation and grammar form an integral part of the course.</p>	<p>At National 4, all assessment is internal on a pass/fail basis.</p> <p>At National 5, assessment is a combination of an internally produced Folio of two pieces of different genres worth 30%, a pass in the 'Spoken Language in performance assessment, and an external exam. The National 5 English exam is in two sections:</p> <p>Paper 1 Reading for Understanding, Analysis and Evaluation – 1 hour, 30 marks.</p> <p>Paper 2 Critical Reading: Scottish Set Textual Analysis (20 marks) and Critical Essay (20 marks) - 1½ hours total</p> <p>National 3 and 4 English are internally assessed.</p>
	<p>Homework</p> <p>Homework is issued when useful and productive. This will include personal reading, note-taking, researching, summarising, preparing for solo talk or group discussion and writing in a variety of forms. There is an S3 Non-Fiction project and an S4 Broadsheet Review, done monthly.</p>
	<p>Useful Information/Resources</p> <p>www.bbc.co.uk/education (N4 and N5 English)</p> <p>www.spl.org.uk (poetry)</p> <p>www.rsc.org.uk (Shakespeare)</p> <p>www.myetutor.tv (N4 – Higher)</p> <p>Textbooks: various by Bright Red, Leckie and Leckie or Hodder Gibson. Department provides practice papers.</p>

Senior Phase and Beyond
<p>S5: Higher (N5 A or B, N5 C by discussion with Curriculum Leader and DHT)</p> <p>N5 (N4 or N5 C, D or lower)</p> <p>S6: Advanced Higher (Higher A or B)</p> <p>Higher (N5 A or B in S5)</p> <p>Further study: English is a key 'facilitating' subject highly regarded for university entry to a wide variety of subjects such as Literature, Linguistics, Law, History, Philosophy, Politics, Psychology, Theatre and Media. 'STEM' subjects place increasingly high value on the quality of applicants' English passes when considering entry to high demand courses such as Law and Medicine.</p> <p>Careers: An English qualification is essential for the vast majority of jobs, college and university courses. Many careers such as journalism, publishing research and information skills, librarianship, speech and language therapy, media and advertising, theatre arts, law, advocacy, tourism management, expect to have English as part of any qualification package.</p>

S3/S4 Course Content	Assessment
<p>The main purpose of the French and German courses offered is to develop the skills of listening and talking, reading and writing. These skills are developed by studying the following contexts: -</p> <p>Society – Lifestyles Environment</p> <p>Employability – Job Skills World of Work</p> <p>Learning – School College Lifelong Learning Future Plans</p> <p>Culture – Customs & Celebrations Holidays Literature Film and Television</p> <p>Learning is divided into two units at each of National 3, National 4 and National 5: -</p> <ul style="list-style-type: none"> • Understanding Language (Reading & Listening) • Using Language (Speaking & Writing) – Writing is only assessed at N4 & N5 	<p>National 5: -. The final exam is made up of a speaking assessment, carried out with the class teacher, a writing assignment completed in class and two exam papers: Paper 1 (Reading and Writing) and Paper 2 (Listening). Each skill makes up 25% of the final exam.</p> <p>National 4: - Pupils must pass unit assessments in the skills of reading, listening, writing and speaking. They must also complete an Added Value Unit, in which they will carry out research into a chosen aspect of an appropriate country and present their findings by means of a presentation and a follow up discussion, carried out with the class teacher.</p> <p>National 3: - As National 4, without the writing assessment or the Added Value Unit.</p>
	Homework
	<p>After most periods. Usually 20-30 minutes for pupils aiming towards National 5, less for those working towards National 3 or National 4. This can take the form of written work, grammar or vocabulary revision.</p>
	Useful Information/Resources
	<p>Pupils are expected to use a language dictionary and for pupils sitting National 5 exams, we strongly recommend buying a dictionary to use to help with homework and to bring to the exam. If you are unsure of which dictionary to buy, please ask your teacher.</p>

Senior Phase and Beyond
<p>Success in National 5 would give the option of progressing to Higher in S5.</p>

S3/S4 Course Content	Assessment
<p>The syllabus is similar to that described already for French/German continuers but compressed into 2 years. Consequently, the pace is quicker and so a beginners' course is a good option for anyone who has worked well and coped with their first foreign language.</p> <p>Course Information:</p> <p>The main purpose of the courses offered is to develop the skills of listening and talking, reading and writing. These skills are developed by studying the following contexts: -</p> <p>Society – Lifestyles Environment</p> <p>Employability – Job Skills World of Work</p> <p>Learning – School College Lifelong Learning Future Plans</p> <p>Culture – Customs & Celebrations Holidays Literature Film and Television</p> <p>Learning is divided into two units at each of National 3, National 4 and National 5: -</p> <ul style="list-style-type: none"> • Understanding Language (Reading & Listening) • Using Language (Speaking & Writing) – Writing is only assessed at N4 & N5 	<p>National 5: - The final exam is made up of a speaking assessment, carried out with the class teacher, a writing assignment completed in class and two exam papers: Paper 1 (Reading and Writing) and Paper 2 (Listening). Each skill makes up 25% of the final exam.</p> <p>National 4: - Pupils must pass unit assessments in the skills of reading, listening, writing and speaking. They must also complete an Added Value Unit, in which they will carry out research into a chosen aspect of an appropriate country and present their findings by means of a presentation and a follow up discussion, carried out with the class teacher.</p> <p>National 3: - As National 4, without the writing assessment or the Added Value Unit</p> <p>Homework</p> <p>After most periods. Usually 20-30 minutes for pupils aiming towards National 5, less for those working towards National 3 or National 4. This can take the form of written work or vocabulary revision.</p> <p>Useful Information/Resources</p> <p>Pupils are expected to use a language dictionary and for pupils sitting National 5 exams, we strongly recommend buying a dictionary to use to help with homework and to bring to the exam. If you are unsure of which dictionary to buy, please ask your teacher.</p>

Senior Phase and Beyond
Success in National 5 would give the option of progressing to Higher in S5.

LITERACY & LANGUAGE
MODERN LANGUAGES FOR LIFE AND WORK
SCQF Levels 3 and 4

S3/S4 Course Content	Assessment
<p>Modern Languages for Life and Work Awards develop learners' language and employability skills, through studying one or two modern languages in practical and relevant contexts for life and work.</p> <p>The Awards are available at SCQF levels 3 and 4.</p> <p>Course Information:</p> <p>The course will develop knowledge and skills in areas such as society, culture and employability.</p> <p>Pupils will also develop communication skills, self-awareness, confidence, leadership and independent learning skills.</p> <p>Pupils will have the opportunity to build on skills developed throughout S1 and S2, while learning a new language.</p> <p>Learning is divided into three units at each of SCQF levels 3 and 4: -</p> <ul style="list-style-type: none"> • Modern Languages for Life • Modern Languages for Work Purposes • Building Employability Skills 	<p>Level 3 – Pupils are assessed in the skills of reading, listening, speaking and writing across the 3 units. Assessments are carried out in school at relevant points throughout the course and are marked on a pass/fail basis.</p>
	<p>Level 4 - Pupils are assessed in the skills of reading, listening, speaking and writing across the 3 units. Assessments are carried out in school at relevant points throughout the course and are marked on a pass/fail basis.</p>
	<p>Homework</p>
	<p>Pupils will be expected to support the work done in school with regular revision of vocabulary at home.</p> <p>Useful Information/Resources</p> <p>This course is aimed at pupils who have found some aspects of language learning challenging and who are interested in a fresh start in a new language, with a focus on culture, leading to level 3 or 4 award.</p>

Senior Phase and Beyond
<p>Success in these courses can lead to a similar qualification in another language or progression to a Level 5 award.</p>

S3/S4 Course Content	Assessment
<p>In the current economic climate, an understanding of how markets and governments make decisions helps to make us more informed and responsible consumers and producers.</p> <p>The National 5 Economics course gives learners confidence in decision-making, by providing practical opportunities to use their initiative in solving economic issues. Learning to analyse economic data in the form of diagrams and graphs promotes their capabilities in employability, enterprise and citizenship. Pupils will use examples relating to both the UK and global markets to develop skills in evaluating a range of economic information.</p> <p>This course is suitable for learners with enquiring, logical, and analytical minds, and for those with an interest in how a market economy operates.</p> <p>At National 5, the Units of study are:</p> <ul style="list-style-type: none"> • Economics of the Market: will provide learners with growing knowledge and understanding of how markets operate. • UK Economic Activity: allows learners to consider the impact of government action on economic issues and problems. • Global Economic Activity: will provide learners with growing knowledge and understanding of global economics and its social impact. 	<p>Learners' progress is assessed regularly throughout S3 and S4 in the form of topic tests to identify and communicate next steps for each individual.</p>
	<p>National 5 is assessed by an external exam which will cover all course content and will count for 75% of the final grade. The other 25% will be assessed by an assignment which will be carried out in class and will involve research on a current topic. Pupils will need to have good numeracy skills to cope with the analysis of economic data. Pupils will need to be on course for National 5 Mathematics at the end of S4 to cope with the analysis of economic data.</p>
	<p>Homework</p> <p>Homework will be issued regularly and will include the completion of class work and formal questions on the topic being covered in class.</p> <p>Homework will also be given in preparation for tests and exams.</p>
	<p>Useful Information/Resources</p> <p>This course is available only at National 5. This course also covers some of the same topics in the early Business Management units.</p> <p>Resources will be made available on Teams and OneNote on Office365, as well as a range of textbooks used in class.</p> <p>There are no specific National 5 Textbooks available</p>

Senior Phase and Beyond
<p>In this course, pupils begin to understand the economic choices that an individual has to make regarding whether to spend, to save or to borrow, learning the concepts of demand and supply in a market economy. These skills are valuable to help pupils make informed decisions in our consumer society and will increase the employment opportunities.</p> <p>Pupils can progress to Higher Economics in S5. This qualification can lead to courses in Business, Finance and Accounting at university or college as well as Economics.</p> <p>Careers include: Business, Finance and Accounting, Economist, Financial risk analyst, Data analyst, Financial consultant, Investment analyst, Economic researcher, Actuary, Public sector roles, Banking</p>

S3/S4 Course Content	Assessment
<p>This course will develop your knowledge and understanding of what makes a business successful and profitable.</p> <p>You will develop an insight into the processes and procedures that successful businesses use to ensure customers' needs are met. You will be encouraged to develop entrepreneurial skills, through practical activities and to develop financial awareness in a business context.</p> <p>You will research how businesses organise their resources and look at how external influences affect organisations, in the current economic climate.</p> <p>At National 5, the Units of study are:</p> <ul style="list-style-type: none"> • Understanding Business: Learners will be introduced to the business environment and will carry out activities relating to the role of business and entrepreneurship in society. • Management of People and Finance: Learners will be introduced to Human Resources and Finance and will complete activities to demonstrate their understanding of how to manage people and finance in order to contribute to business success. • Management of Marketing and Operations: Learners will be introduced to Marketing and Operations. They will develop an understanding of how marketing can be used to enhance competitiveness and will be introduced to the processes organisations use in order to maintain quality and competitiveness. 	<p>Learners' progress is assessed regularly throughout S3 and S4 in the form of topic tests to identify and communicate next steps for each individual.</p> <p>At National 4, all units will be internally assessed. Learners will prepare a simple business proposal for an aspect of a new small business.</p> <p>At National 5, an external exam will cover all course content and will count for 75% of the final grade. The other 25% will be assessed by an assignment which will be carried out in class and will involve research on a current business topic.</p>
	Homework
	<p>Homework will be issued regularly and will include the completion of class work and formal questions on the topic being covered in class.</p> <p>Homework will also be given in preparation for tests and exams.</p>
	Useful Information/Resources
	<p>In this course pupils will develop the skills to communicate business ideas effectively and will be encouraged to think creatively about the economic and financial environment in which businesses operate.</p> <p>The study of organisations in the private, public and voluntary sectors will promote the development of employability skills.</p> <p>Resources will be made available on Teams and OneNote on Office365, as well as a range of textbooks used in class.</p>

Senior Phase and Beyond
<p>Completion of this course can lead to progression into Higher Business Management in S5 and Advanced Higher Business Management in S6. This can prepare pupils for courses at university and colleges including Business, Finance and Accounting as well as Management of Human resources.</p> <p>The entrepreneurial skills that are encouraged will benefit pupils in any area of their working lives. The ideas and principles of good business practice that are learned give an insight in how to be successful.</p> <p>Careers include: Business Analyst, Chartered Accountant, Corporate Investment Banker, Management Consultant, Risk/Project Manager, Stockbroker, Sales Executive, Mortgage Broker</p>

S3/S4 Course Content	Assessment
<p>Course Information: Pupils will obtain a detailed knowledge and understanding of the subject with a British and world-wide scope. Their geographical skills and techniques, including practical fieldwork, will be developed through analysis of topics in the following three areas:</p> <p>Physical Environments: Pupils study weather and a variety of landscape types in the UK including coasts and glaciated uplands. They consider how they influence people and how people have impacted on them as well as how best to manage these important landscapes.</p> <p>Human Environments: By comparing developed and developing countries students consider factors causing changes in population and in urban and rural areas. They research the impact of these changes and how best to manage them for the benefit of people and the environment.</p> <p>Global Issues: Pupils learn about the scale, impacts and management of significant current global geographical issues. These will include:</p> <ul style="list-style-type: none"> • Hazards: comprising volcanoes, earthquakes and tropical storms. • Health: comprising the spread of global disease in developing and developed countries. 	<p>National 5 is externally assessed by SQA in the form of an exam. At National 3, 4 and 5 pupils have to pass Unit assessments in the three areas. Unit assessment methods include formal tests, reports and presentations.</p> <p>For National 4 and 5, pupils are expected to complete an 'Added Value' Unit. This Unit enables pupils to select an area of interest, research it further, collect data in the form of fieldwork and discuss results in the form of an assignment.</p>
	<p>Homework</p> <p>Pupils will be expected to spend 1 hour a week and written tasks will be issued to support their learning in class. But they are also expected to read and refresh their course work on a regular basis. Regularly reading about development, environmental and social issues in the media will support their learning. Assignment preparation deadlines will be set when appropriate.</p>
	<p>Useful Information/Resources</p> <p>Revision materials will be available on the teacher file sharing internet site, Teams</p> <p>Revision materials are available on the BBC Bitesize website</p> <p>The Geography department uses Twitter (@BHSGeo) to share up-to-the minute developments in Geography</p> <p>National 5 exam booklets can be purchased from Leckie & Leckie</p>

Senior Phase and Beyond
<p>Entry requirements into Higher will be an A-C pass at National 5. A 'C' pass will be at teacher discretion.</p> <p>At Higher the pupils will continue to study: Physical Environments, Human Environments, and Global Issues, learning some topics in more depth and being introduced to brand new topics. There is an emphasis on analytical skills for problem solving.</p> <p>Today, the importance of Geography and the significance of contemporary geographical research are clearly apparent when applied globally and nationally in a continually changing world repeatedly facing environmental, political and economic issues. The course lends itself well to fieldwork, building on the key skills of collecting, processing and evaluating information accurately.</p> <p>Careers include: planning; logistics; tourism; development NGOs; UN; environmental management; civil engineering; SEPA; renewables; conservation.</p>

COURSE TITLE
LEVELS

SOCIAL STUDIES
HISTORY
NATIONAL 3, 4 AND 5

S3/S4 Course Content	Assessment
<p>Unit 1: The Atlantic Slave Trade: Exploring the brutality of the Slave Trade in the Caribbean Islands this topic looks at moral issues, such as race and religion in order to understand the relationship between white slave traders and black African slaves. Themes studied include the nature of the trade on human beings; life in the Caribbean plantations; slave rebellions and resistance; the abolition campaign and the eventual end of the trade in 1807. A fascinating opportunity for students to think about complex issues to do with human kind as well as learning how the profits made from this ugly trade enriched cities like Glasgow, Liverpool and London.</p> <p>Unit 2: The Era of the Great War – 1910 – 1928: Technology changed the way in which WW1 was fought; artillery guns, tanks and deadly gases all played a key role in this tragic period of history. Find out how weapons were used in some of the war's most famous, albeit deadly battles, like The Somme and Passchendaele. Discover how the brave young men of Scotland and Britain survived the battlefields and daily life in the trenches. Studying this topic will reveal how the war changed life for people at home in Scotland and Britain. Learn about the role men played when not fighting and how the work done by women during WW1 contributed to the campaign for female suffrage</p> <p>Unit 3: Lenin and the Russian Revolution, 1894-1921: Power, passion and revolution form the backdrop to the story of the Tsar's fall from grace. This is one of history's best epic tales which allows students to learn about the revolutions in Russia. This unit also covers Lenin's short period of rule as head of the new Bolshevik government, the leader of Russia's first communist government and the tragic events of the Russian Civil War. All units are taught via a combination of traditional methods as well as ICT, video, peer interaction, cooperative learning and active learning. Essay skills work and source skills are handled in each unit.</p>	<p>There is no external assessment for National 3 or National 4. All evidence will be assessed internally. At National 4 level, learners will also undertake an Added Value Unit (AVU). This requires and enables pupils to research an area of interest from one of the Units studied and produce a written report. Work is done in class as part of homework. All National 4 work is internally assessed.</p> <p>For National 5, pupils will sit an external exam at the end of S4, and a written Assignment. National 5 is externally assessed by SQA. Pupils have to pass all assessments at National 4 level to be eligible to complete the National 5 SQA exam. Please note the Units of study are the same for both National 4 and 5 and are taught over two years.</p>
	Homework
	<p>We encourage pupils to do up to one hour per week. In addition, we encourage weekly revision, via re-reading class work. Prior to examinations, we also support and encourage pupils to practise exam technique using past papers from the SQA website.</p>
	Useful Information/Resources
	<p>Additional information: History, despite its name, is not a traditional subject, but one which aims to provide key skills for life-long learning and the basis of essentials required across many other subjects. Our teaching methods and units of study aim to nurture pupils into becoming successful learners via literacy and numeracy, evaluation and thinking skills. The course encourages pupils to develop analytical thinking skills and empathy, foster independent learning and debating abilities as well as develop creative skills. Resources: Additional class resources and revision materials are provided at on Teams: a free and secure site for pupils. National 4&5 books are used to support pupil learning as well as teacher written study support guides. Additional support is also after school by History teaching staff.</p>

Senior Phase and Beyond
<p>Entry requirements into Higher will be an A-B pass at National 5. Entry through a 'C' pass will be at teacher and pupil discretion. The National 5 unit provides the basis for many skills that dovetail seamlessly into the Higher History course. At Higher, the pupils will study: Modern British History, The USA 1916-1968 and Scottish Migration and the Empire 1830-1939.</p> <p>History Higher is a subject, which provides the opportunity for pupils to follow a career not just into the Humanities and Law but into business too. By utilising a range of teaching techniques, students benefit from gaining analytical and information processing skills, which are integral to the sciences and engineering, as well as building literacy and creative skills essential to a whole range of careers.</p>

S3/S4 Course Content	Assessment
<p>Unit 1: Democracy in the United Kingdom: Representation (MPs, PM & Government, and the House of Lords), Participation (e.g. political parties), Election campaigns (including the FPTP voting system), and Political Influence (pressure groups and the media).</p> <p>Skills of using sources to detect bias, exaggeration or selectivity in the use of facts.</p> <p>Unit 2: Social Issues in the United Kingdom: Social Inequality or Crime and the Law</p> <ul style="list-style-type: none"> • Nature/causes • Impact • Responses • Evaluation of responses <p>Skills of using sources to make and justify decisions.</p> <p>Unit 3: International Issues: World Powers: the USA Role in International Relations (including relationship with Scotland), Political System, Social and Economic Inequalities (including Government responses).</p> <p>Skills of using sources to draw conclusions.</p> <p>Added Value Unit (AVU) & Assignment: Pupils must complete an Added Value Unit to achieve a National 4 qualification in Modern Studies. Learners will demonstrate the ability of independent learning and research a topic within course guidelines, which demonstrated challenge and application. Pupils will be able to negotiate appropriate presentation methods with their teacher.</p> <p>At National 5 level, pupils will write up their AVU in exam conditions as their Assignment: worth 20 out of 100 marks for the course (20%).</p>	<p>At National 3, 4 and 5 pupils have to pass all the Assessment Outcomes in each of the three areas. An appropriate range of Unit assessment methods will be used.</p> <p>There is no external assessment for National 3 or National 4. All evidence will be assessed internally. For National 5, pupils will sit an external exam at the end of S4, and an Added Value Unit written Assignment.</p> <p>Homework</p> <p>Up to an hour per week for pupils aiming towards National 5, less for those working towards National 3 or National 4.</p> <p>This includes pupils to revising on a regular basis what we cover in class and keep a close eye on current affairs through the news media (e.g. BBC News).</p> <p>Useful Information/Resources</p> <p>Additional information: Modern Studies aims to nurture pupils into becoming successful learners through the skills of literacy and numeracy, evaluation and thinking skills; effective contributors and confident individuals through group work, presentations and debate; and responsible citizens through employability skills, enterprise and citizenship.</p> <p>Resources: All Curricular area power point resources and revision materials will be on Teams: a free and secure site pupils and parents can join.</p> <p>The Modern Studies department uses Twitter (@BHSMoStuds) to share up-to-the minute developments in topic areas.</p> <p>National 4&5 course books are used to support pupil learning. Additionally, a range of Study/Revision Guides are commercially available, as well as Specimen / Past Paper books.</p>

Senior Phase and Beyond
<p>Entry requirements into Higher will be an A-C pass at National 5. Entry through a 'C' pass will be at teacher and pupil discretion.</p> <p>At Higher the pupils will study: Democracy in Scotland, Social Issues: Crime & the Law, and International Issues/World Power: China.</p> <p>Modern Studies provides the opportunity for pupils to follow a career in journalism, law, politics, civil service, television, the police and the health service, to name but a few.</p>

CURRICULUM AREA
COURSE TITLE
LEVELS

SCIENCES
SCIENCE AND HEALTH
NPA LEVEL 4

S3/S4 Course Content	Assessment
<p>This course is for pupils who require additional time to consolidate their learning from S1/2 Science. The course aims to help pupils become secure at CfE Levels 2 and 3 and leads towards qualifications at level 4 Science in S4. There are plenty of opportunities to explore the content in a variety of practical and hands on ways and pupils are given the freedom to demonstrate their progression in more ways than just traditional assessments. The pupils may also be given the chance to take part in the 'Prince's Trust Achieve' programme alongside this qualification, further adding to their skillsets. The topics covered in Science and Health are:</p> <p>Physics: Waves and Radiation</p> <ul style="list-style-type: none"> - Wave characteristics - Sound - Electromagnetic spectrum - Nuclear radiation <p>Nature's Chemistry</p> <ul style="list-style-type: none"> - Fuels - Hydrocarbons - Everyday consumer products - Plants to products <p>Science: Human Health</p> <ul style="list-style-type: none"> - What is health? - Threats to health - Health claims <p>Science Practical Skills</p> <ul style="list-style-type: none"> - Record observations and measurements from scientific apparatus - Carry out practical scientific procedures - Present and calculate scientific practical results <p>Health Sector: Life Sciences Industry</p> <ul style="list-style-type: none"> - Investigate a range of product types made by the life sciences industry - Demonstrate the use of a biomedical device for a specified task 	<p>A wide range of different teaching and learning methods is used to create a varied and engaging experience. School and SQA assessments will be embedded within these activities.</p>
	<p>Pupils will work through a full programme of investigative experimental work and activities, taking full advantage of the latest learning technologies including data logging, real-time video capture, computer animations and simulations and video resources.</p>
	<p>The assignment (N4 only) is a practical investigation on based on one of the areas above.</p>
	<p>Homework</p> <p>Homework exercises will be issued. These activities will be marked in class. Pupils are given notes for all Topics but must make their own Revision Notes for each Topic.</p> <p>Revision and Study Support classes are held at lunchtimes on Mon-Thurs to assist with homework tasks throughout the year.</p>
	<p>Useful Information/Resources</p> <p>Course notes will be provided to pupils and can be assessed on BBC Bitesize on Office 365 SharePoint and Teams</p>

Senior Phase and Beyond

SCIENCES
BIOLOGY
NATIONAL 3, 4 AND 5

S3/S4 Course Content	Assessment
<p>Biology, the study of living organisms, plays a crucial role in our everyday existence and is an increasingly important subject in the modern world. Biology affects everyone and aims to find solutions to many of the world's problems. Advances in technologies have made this varied subject more exciting and relevant than ever.</p> <p>Biology courses encourage the development of skills and resourcefulness, leading to students becoming more confident individuals. Successful learners in biology think creatively, analyse and solve problems. Studying relevant areas of biology such as health, environment and sustainability helps to produce responsible citizens.</p> <p>The Unit titles for the course are:</p> <ul style="list-style-type: none"> • Cell Biology – exploring the structures inside cells and the functions they carry out. • Multicellular Organisms – an introduction to the structure and function of the nervous, circulatory, reproductive and respiratory systems • Life on Earth – An exploration of how living things interact in their ecosystems and how they depend on one another. 	<p>There is no external assessment for National 3 or National 4. Unit assessments and the gathering of evidence of attainment will be carried out within the department.</p> <p>National 5 Biology includes an external exam at the end of S4 as well as an externally marked coursework assignment.</p>
	Homework
	<p>Pupils are expected to take responsibility for their learning and look over their work each week. This consolidation work is supported by resources available on the biology SharePoint site. Additional Home study exercises take the form of practice questions, assessment revision and creative tasks allowing students to demonstrate understanding of course content.</p>
	Useful Information/Resources
	<p>Pupils must come to class with a pen, pencil, ruler and calculator to engage actively in their learning.</p> <p>A selection of revision and support materials including PowerPoint notes, practice questions and weblinks are available to pupils via the department's SharePoint site.</p>

Senior Phase and Beyond	
Possible progression routes	
National 5 Biology	→ Higher Biology or Higher Human Biology in S5, Advanced Higher in S6.
National 4 Biology	→ NPA Level 5 Practical Science

CURRICULUM AREA
COURSE TITLE
LEVELS

SCIENCES
CHEMISTRY
NATIONAL 3, 4 AND 5

S3/S4 Course Content	Assessment
<p>Pupils gain deeper understanding of chemistry's impact on the environment, society and how chemicals react to form new substances. Topics covered are:</p> <p>S3</p> <ol style="list-style-type: none"> 1 Introduction to Chemistry 2 Reaction Rates 3 Atomic Structure 4 Bonding & Properties 5 Chemical Formulae and Moles 6 Acids and Bases 7 Metals <p>S4</p> <ol style="list-style-type: none"> 8 Fuels and Hydrocarbons 9 Polymers & Novel Materials 10 Carbohydrates and Alcohols 11 Carboxylic Acids 12 Redox (Reduction and Oxidation) 12 Fertilisers & Environmental Analysis 13 Nuclear Chemistry <p>These deliver the key chemical theory and serve to develop skills.</p> <p>The assignment offers pupils the opportunity to apply the skills they have developed and the chemical knowledge they have acquired in an investigation of a chemical application that has a significant impact on society, the environment or the economy.</p>	<p>A wide range of different teaching and learning methods is used to create a varied and engaging experience. School and SQA assessments will be embedded within these activities.</p> <p>Pupils will work through a full programme of investigative experimental work and activities, taking full advantage of the latest learning technologies including data logging, real-time video capture, computer animations and simulations and video resources.</p>
	Homework
	<p>Homework exercises will be issued. These activities will be marked in class. Pupils are given notes for all Topics but must make their own Revision Notes for each Topic.</p> <p>Revision and Study Support Chemistry classes are held at lunchtimes on Mon-Thurs to assist with homework tasks throughout the year.</p>
	Useful Information/Resources
	<p>Course notes will be provided to pupils and can be assessed on www.evans2chemweb.co.uk on Office 365 SharePoint on SCHOLAR website</p>

Senior Phase and Beyond
<p>This course forms the basis for progress onto study of chemistry at Higher level in S5 or S6 if a pupil achieves a Grade A, B or C at N5. If a pupil achieves N4 Chemistry in S4 or achieves Unit Passes at N5 they will have the option of completing a relevant N5 course in S5 and then Higher Chemistry in S6.</p> <p>Chemistry gives an excellent foundation and enable progress into well-paid and respected jobs in various professions. What will YOU do? Medicine and Veterinary Medicine, Dentistry, Engineering, Sports Science, Clinical Psychology, Law, Accountancy or Business? The skills you gain from studying chemistry open up more opportunities than you may have realised in other areas too: Finance, Teaching, Marketing, Patent Law, Photography, Art Restoration, Media and Film Production, Food Technology</p>

S3/S4 Course Content	Assessment
<p>Physics makes you use your imagination and helps you to understand how and why things work. The Physics courses at National 3, National 4 and National 5 level are designed to show the importance of Physics in our everyday lives.</p> <p>Many things we depend on, such as transport, power and modern technology are based on the laws of Physics. By studying Physics, you will learn to investigate scientific questions and develop skills in making decisions based on information and reasoning.</p> <p>The course is split into 6 sections:</p> <ul style="list-style-type: none"> • Electricity • Properties of Matter • Waves • Radiation • Dynamics • Space 	<p>There is no external assessment for National 3 or National 4. Unit assessments and the gathering of evidence of attainment will be carried out by the department. National 5 Physics includes an assignment carried out in December of S4 and an external exam at the end of S4.</p>
	Homework
	<p>Homework exercises will be issued weekly. Homework will take approximately 30 minutes to complete. Pupils are expected to take responsibility for their learning and look over their work each week.</p>
	<p>Useful Information/Resources</p> <p>Pupils must come to class with a pen, pencil, ruler and calculator to engage actively in their learning.</p> <p>We have a large selection of revision and support materials including summary notes, tutorial questions and past papers that are available to pupils via the department's SharePoint page on Office365.</p>

Senior Phase and Beyond
<p>Possible progression routes</p> <p>National 5 Physics → Higher Physics in S5, Advanced Higher Physics in S6.</p> <p>National 4 Physics → National 5 or NPA Science in S5, Higher Physics in S6.</p>

S3/S4 Course Content	Assessment
<p>The course will operate at CfE third and fourth levels in S3 and merge into NQ at a level appropriate for pupils' ability later in S3 - and by S4 at the latest.</p> <p>Over S3 and S4 pupils will develop skills and techniques in all areas of the visual arts building towards a completed Design Unit and Expressive Unit by the end of S4. There will be an increasing emphasis on personalisation and choice as the course develops. The Art and Design Studies element (written critical work) is delivered in tandem with the Design and Expressive practical units.</p> <p>National 3</p> <p>There are no discrete classes at National 3 level. However, this level of qualification will be available for pupils who do not attain National 4 level.</p> <p>Additional information: It should be noted that there is no final practical exam in Art & Design courses and the final folio submitted to the SQA for National 5 (and internally assessed for National 4) will be made up of a pupil's best work completed over the course. All pupils will sit a 5-hour practical "prelim" which will benefit their expressive unit by making up the final expressive piece. The folio is worth 160 marks (80 for each unit). The additional written exam for National 5 only is worth 40 marks.</p> <p>All pupils will follow the same course and presentation level (at National 4 or 5) will only be decided towards the end of S4 when all work has been reviewed.</p>	<p>For National 5 both the Design and Expressive units form a folio submitted to the SQA for central assessment and certification at the end of S4. Pupils sit a 1 Hr written exam during the SQA exams at the end of S4. National 4 pupils do not have any external assessments as the Added Value Unit (folio) is internally assessed. There is no written exam at National 4.</p>
	<p>Homework</p> <p>Occasionally, pupils will be expected to complete Art & Design studies tasks as formal homework. The practical units will require pupils to take their folders home, and /or complete work at lunchtimes and after school as necessary depending on their level and chosen project. Although this varies, we expect pupils to spend a total of about 2 hours per week on extra study by S4.</p>
	<p>Useful Information/Resources</p> <p>Please consult the Art department section of the school website for links to study support, careers advice and other useful information.</p>

Senior Phase and Beyond
<p>Progression: Progression routes from S4 would be to National 5 or Higher in S5 and then in S6 to a variety of options tailored to meet individual needs such as Creative Industries, Advanced Higher Art & Design, Higher Photography or complimentary CDT courses such as Graphic Communication, Product Design & Manufacture and Engineering Science for pupils interested in architecture, design and engineering.</p> <p>Career Options: Art & Design is a valuable qualification not only for fine art, design and engineering-based career options, but also because it compliments skills in other curriculum areas by highlighting visual intelligence, creativity and imagination – skills desired by both universities and employers. It is an important area of study for employment with the Creative Industries sector comprising advertising, architecture, art, crafts, design, fashion, film, music, performing arts, publishing, R & D (product design), software, toys and games, TV and radio, and video games.</p>

Course Content	Assessment
<p>This course will involve development of both creative Drama skills and Production skills.</p> <p>Coursework involves both individual and group tasks which develop skills as an Actor and in Production roles – Lighting, Sound, Props, Set design, Costume design, Make-up and Hair. Throughout the course learning is evidenced through creating a portfolio and performance and evaluation tasks.</p> <p>Learners will explore improvisation activities, script work and analysis of text, creating and developing original drama for performance, exploration of voice and movement, characterisation, evaluation and design of production areas to complement and enhance theatre. Learners will develop through practical tasks supported by theoretical and complementary study and research activities</p> <p>Learning is divided into two units at each of National 3, National 4 and National 5:</p> <ul style="list-style-type: none"> • Drama Skills: National 3, National 4 and 5 • Production Skills: National 3, 4 and 5 	<p>At National 3 the learners will be internally assessed on an ongoing basis through performance tasks and evaluation.</p> <p>At National 4 learners will be internally assessed through the added value unit which takes the form of a devised Drama performance. There is no external exam for National 4. Naturally occurring evidence will be collated throughout the course and an evaluation of the added value performance will for part of the internal course assessment.</p> <p>At National 5 unit assessments (Drama Skills and Production Skills) are assessed internally by means of a folio, performance and evaluation. The course assessment has two components:</p> <p>Performance – practical application of an Acting or Production role to a text. This is internally assessed and verified by a visiting assessor. 60 marks</p> <p>Written Paper – This is completed during the main exam diet and externally assessed.</p> <p>Homework</p> <p>Learners are expected to complete regular homework tasks which are either preparatory or reflect. Much of the folio work for Drama and Production skills units will be completed at home.</p> <p>Useful Information/Resources</p> <p>Learners will have access to all resources via the OneNote page. The Drama department also has a Twitter Page where regular updates and information are posted. Follow us on @bmuirdramadept.</p>
<p>Senior Phase and Beyond</p> <p>Within the senior phase students will progress through National 4 or 5 in S4 and on to National 5, Higher and Advanced Higher Drama in S5 and S6. Higher Drama is accepted by Further and Higher Education establishments and is recommended for courses in the Arts, Media, English and Law.</p>	

S3/S4 Course Content	Assessment
<p>S3 Media is an introduction to the subject and its concepts in which pupils analyse media texts and create their own. By doing so, they develop essential skills such as literacy and critical thinking that help them engage more fully with the media they consume every day.</p> <p>In S3, pupils study a variety of films to introduce them to the key aspects of media. They look at the processes by which films are made and how different audiences respond to them. In S4, they will focus on one genre to assist them in their exam work; genres and texts we have covered in the past include the Horror genre with Psycho (1960) and Scream (1996), and the Teen genre with Clueless (1995) and Juno (2007). Along with film, pupils will be introduced to a variety of other media texts that will go on to help them in S4.</p> <p>Pupils develop creativity by making their own moving image text individually and work co-operatively in groups to research, plan, create and evaluate moving image text with digital video cameras and editing software. Crucial group skills are developed and reinforced.</p> <p>Media involves a lot of essay-based tasks, especially in S4, so a firm grasp of English is essential.</p>	<p>Media in S3 overtakes key CfE Experiences and Outcomes at third and fourth levels drawn from both Literacy and English and Expressive Arts. It prepares pupils for moving on to Nationals in S4, with the assumption that most candidates will be presented at National 5 level at the end of S4 and will then progress to Higher in S5.</p> <p>In place of formal unit assessments, pupils will be given a number of opportunities throughout the year to generate evidence of their progress in the subject.</p> <p>Homework</p> <p>Regular homework assignments will reinforce concepts introduced in class. Homework will cover both analysis and practical tasks.</p> <p>Useful Information/Resources</p> <p>Relevant support materials, links etc. will be uploaded to TEAMS (office 365) regularly.</p>

Senior Phase and Beyond
<p>Higher Media. University degree courses, employment in the creative industries, advertising, PR etc.</p> <p>Media enables pupils to develop skills that will support their learning across the curriculum and that will prove attractive to future employers:</p> <ul style="list-style-type: none"> • literacy and communication • critical thinking • problem solving • creativity • group work

MUSIC
MUSIC PERFORMING
NATIONAL 3, 4 AND 5

S3/S4 Course Content	Assessment
<p>This course is suitable for all young people with an interest in Music. It provides opportunities for learners to acquire and develop attributes and capabilities such as creativity, flexibility and adaptability; enthusiasm for learning and motivation to learn; perseverance, independence and resilience, reliability and confidence and enterprise</p> <p>Pupils build their skills by studying 3 main elements in the course. These are:</p> <p><u>Performing</u> – Worth 60% of the overall Course Award mark. Pupils will be expected to perform on two instruments by S4. The performance exam lasts 6 mins (approx. 3 mins each instrument). The practical performance exam takes place in Feb/March of S4. Pupils can choose from all classroom instruments keyboard, xylophone, guitar, voice, and/or their own instruments.</p> <p><u>Understanding Music</u> – Worth 40% of the Overall mark. Pupils study music from Bach to the Blues! A written paper testing musical knowledge and understanding of concepts takes place in the May of S4.</p> <p><u>Composing</u> – This has currently been removed, but any updates will be communicated if any changes.</p>	<p>National 3 and National 4 qualifications are internally assessed and subject to verification by the SQA. National 5 level performing, understanding and composition are externally assessed.</p>
	<p>Homework</p> <p>Pupils will be expected to complete about 20 minutes of homework per week as well as practice on their chosen instruments.</p>
	<p>Useful Information/Resources</p> <p>A TEAMS page is available to all Music pupils in S3 with all revision materials and useful web links.</p> <p>Pupils do not need to receive private music lessons or music lessons from the instrumental music service to study music at this level.</p>

Senior Phase and Beyond
<p>Boroughmuir High School Music department is sector leading and in the top 10% for exam results in Scotland and the highest across all Edinburgh Schools at all levels. Pupils can study Music up to Advanced Higher within the department. We routinely send young people to Further Education Colleges and University. A Music qualification can gain you entrance into University for both Music specific and non-Music specific courses.</p>

S3/S4 Course Content	Assessment
<p>This course is suitable for all young people</p> <p>The purpose of the National 5 Music Technology course is to enable candidates to develop their knowledge and understanding of music technology and music concepts, particularly those relevant to 20th and 21st century music (the history of popular music). Candidates develop technical and creative skills through practical learning. The course provides opportunities for candidates to develop their interest in music technology and to develop skills and knowledge relevant to the needs of the music industry.</p> <p>Skills, knowledge and understanding for the course:</p> <ul style="list-style-type: none"> • Knowledge and understanding of 20th and 21st century styles and genres of music, and how this relates to the development of music technology • Knowledge of the features and functions of music technology, hardware and software • Skills in using music technology hardware and software to capture and manipulate audio • Planning, implementing and evaluating sound production • Application of music technology in creative ways <p>Awareness of a range of contexts in which music technology can be applied</p>	<p>Question paper - 1 hour listening paper</p> <p>Assignment - comprises of 2 productions. Examples include Sound Foley, Multi Track Recording, Game Sound design etc.)</p>
	Homework
	<p>Pupils will be expected to complete about 20 minutes of homework per week as well as practice their skills in recording and mixing in their own time.</p>
	Useful Information/Resources
	<p>A TEAMS page will be available to all Music Technology pupils in S3 with all revision materials and useful web links.</p> <p>Pupils do not need to be able to play a musical instrument to a high standard to complete this course, but an interest in Music and how Music is created is essential.</p> <p>This course is subject to numbers</p>

Senior Phase and Beyond
<p>Boroughmuir High School Music department is sector leading and in the top 10% for exam results in Scotland and the highest across all Edinburgh Schools at all levels. Pupils can study Music up to Advanced Higher within the department. We routinely send young people to Further Education Colleges and University. A Music qualification can gain you entrance into University for both Music specific and non-Music specific courses.</p>

Course Content 1	Course Content 2
<p>S3/4 Course Content</p> <p>The National 4/5 course enables pupils to demonstrate and develop movement and performance skills in a variety of physical activities.</p> <p>Learners will develop an understanding of how mental, emotional, physical and social factors can impact performance whilst investigating various ways to develop performance.</p> <p>Learners will use various methods to collect data/information on performance, which will allow them to identify performance strengths and areas requiring development.</p> <p>Learners will also gain knowledge of how to design, implement, record and monitor training programmes to successfully develop performance in variety of activities.</p> <p>Written Portfolio (50%)</p> <p>All learners will complete a written portfolio to demonstrate their knowledge of the course content. The portfolio will allow learners to identify an aspect of performance requiring development, collect data on performance, design and implement an individual training programme and record/monitor progress throughout.</p> <p>The Portfolio contributes to 50% of the overall course grade.</p> <p>Lessons in Physical Education will be split between practical and classroom-based theory sessions.</p>	<p>Performance Assessment (50%)</p> <p>All pupils are required to be assessed in two activities of their choice. Performances are assessed in the following areas: Performance repertoire, control and fluency, effective decision making, roles/responsibilities and tactics/composition, rules/regulations, etiquette and the managing of emotions.</p> <p>Pupils are expected to prepare for the Performance Assessment from the start of S3 by regularly practising their activities at our extracurricular or local sports clubs. Most activities will be assessed in school. However, if we do not have the facilities to accommodate an activity, pupils will be expected to submit video evidence of their performance. All activities must be assessed in performance/competition settings.</p> <p>The Performance Assessment contributes to 50% of the overall course grade.</p>
	<p>Homework and course materials</p> <p>Homework may include written exercises, research tasks and/or performance evaluations.</p> <p>Pupils will have access to resources on Microsoft Teams.</p>
	<p>Useful Information/Resources</p> <p>BBC Bitesize: Physical Education</p> <p>Twitter: @boroughmuirPE</p>

Senior Phase and Beyond
<p>Progression Routes:</p> <p>National 5 PE → Higher PE in S5, Advanced Higher PE in S6. National 4 PE → National 5 PE in S5, Higher PE in S6. Alternative Routes → Sports Leaders. Exercise and Fitness NPA in S5/6</p> <p>Careers: Administration, Sports Medicine, Sports Science, Sports Coaching, Sports Analysis, Sports Development and Physical Education Teaching.</p> <p>Please note: Physical Education has an equal weighting to all other curricular areas in terms of SCQF tariff points and value.</p>

S3/S4 Course Content	Assessment
<p>RMPS is the study of people and their beliefs and ideas. The course examines religious, moral and philosophical issues that affect the world today. Pupils will evaluate these and develop their own ideas and opinions.</p> <p>The course consists of three units</p> <ol style="list-style-type: none"> 1. World Religion: Pupils will examine one religion and focus on the link between what people believe and the way they act in the world today. We will choose one religion from Buddhism, Christianity, Islam, Sikhism, Hinduism or Judaism. 2. Morality and Belief: Pupils will examine a moral issue facing the world today. They will examine religious and non-religious views on the issue and evaluate these, as well as looking at their own ideas and opinions. The topics that can be examined are justice, relationships, environmental and global issues, medical ethics and conflict. 3. Religious and Philosophical Questions: Pupils will examine topics that look at some of the big questions in life such as: Where does life come from? Does God exist? Do miracles happen? and the problem of evil. 	<p>There is no external assessment for Access 3 or National 4. All evidence will be internally marked. For National 5, the Assignment will be externally assessed, and students will sit an external exam at the end of S4. Unit assessments will be completed in a portfolio to allow personalisation and choice across a variety of different methods to suit the pupils learning styles.</p> <p>In addition to the three units; pupils at National 4 and National 5 pupils are expected to complete an added value unit. Pupils will investigate a topic of their own choice, religious, moral or philosophical, and present their findings, supported with their own ideas and opinions.</p>
	Homework
	<p>Up to an hour per week for pupils aiming towards National 5, less for those working towards Access 3 or National 4. In addition, regular revision of content covered in class is greatly encouraged.</p> <p>Pupils will also be expected to carryout research for the Assignment or added value unit at home.</p>
	Useful Information/Resources
	<p>There is a strong focus on the development of thinking skills particularly the application of knowledge to real life situations, analysis and evaluating viewpoints as developing ideas and opinions.</p>

Senior Phase and Beyond
<p>RMPS is offered at Higher and is available at Advanced Higher.</p> <p>Religious, Moral and Philosophical Studies provides a basis for the future study of philosophy. RMPS may help prepare pupils for future careers which involve working with people such as; the Civil Service, Journalism, Law, Medicine, Caring Professions and Teaching.</p>

S3/S4 Course Content	Assessment
<p>This course will provide with experience of real-life administration tasks and engaging practical activities relevant to the world of work. There is an emphasis on the development of transferable life skills and the application of these skills.</p> <p>You will develop administrative and IT skills, enabling you to effectively contribute to and support organisations by:</p> <ul style="list-style-type: none"> • Developing an understanding of administration theory in the workplace • Developing IT skills (word processing, spreadsheets, databases, desktop publishing and presentation) and using them to perform administrative tasks related to an event or business • Developing skills in using technology for electronic communication and investigation • Acquiring organisational skills in the context of organising and supporting events. 	<p>At National 4, all units will be internally assessed.</p>
	<p>At National 5, an external exam will cover all course content and will count for 42% of the final grade. The other 58% will be assessed by an assignment which will be carried out in class under exam conditions then externally marked by SQA. This will involve demonstrating the use of different IT applications and theory of administration in the workplace.</p>
	<p>Homework</p>
	<p>Homework will be issued regularly and will include the completion of class work and formal questions on the topic being covered in class.</p> <p>Homework will also be given in preparation for tests and exams.</p>
	<p>Useful Information/Resources</p>
	<p>The Course contains a significant practical component, encouraging the integration of skills, knowledge and understanding through practical activities. The Course makes an important contribution to general education through developing a range of essential skills which will stand learners in good stead regardless of the career path they ultimately choose. Its contribution to vocational education is just as significant, as it opens up progression to a range of careers in administration and IT.</p>

Senior Phase and Beyond
<p>Completion of this course can lead to progression into Higher Administration and IT.</p> <p>This Course is designed for those who are interested in administration and practical uses of IT and want to develop their administrative and IT skills further. Completion of this course will allow you to utilise the acquired administration- and IT related knowledge, understanding and skills at home, in the wider community and, ultimately, in employment.</p> <p>Careers include Banking, Accounting, Insurance, Civil Service, Reception work, secretarial work, paralegal services, travel and tourism, procurement, office management, payroll administration, clerical work, quality management, transport administration, call centre operations, human resources, event management, data administration, local government, court administration, distribution administration, customer support services, housing administration, health service administration.</p>

S3/S4 Course Content	Assessment
<p>This course aims to help you develop a range of computing and computational thinking skills. You will learn how to analyse and solve problems. And, you will develop skills in design and modelling, developing, implementing and testing digital solutions across a range of contemporary contexts.</p> <p>The course has four areas of study:</p> <p>Software design and development</p> <ul style="list-style-type: none"> develop your programming and computational-thinking skills by implementing practical solutions in Python and explaining how these programs work. Tasks involve some complex features (in both familiar and new contexts), that require some interpretation by you be expected to analyse problems, and design, implement, test and evaluate your solutions <p>Computer systems</p> <ul style="list-style-type: none"> develop an understanding of how data and instructions are stored in binary form and basic computer architecture gain an awareness of the environmental impact of the energy use of computing systems and security precautions that can be taken to protect computer systems. <p>Database design and development</p> <ul style="list-style-type: none"> develop knowledge, understanding and apply computational-thinking skills to analyse, design, implement, test, and evaluate practical solutions, using a range of development tools such as SQL <p>Web design and development</p> <ul style="list-style-type: none"> develop knowledge, understanding and apply computational-thinking skills to analyse, design, implement, test and evaluate practical solutions to web-based problems, using a range of development tools such as HTML 5, CSS and JavaScript 	<ul style="list-style-type: none"> At National 4 learners will be given an assignment to demonstrate their knowledge and understanding by applying their skills in a practical context. There is no external exam. At National 5 learners will sit an external question paper which counts for 69% of the final grade. The remaining 31% will be assessed by an open-book assignment carried out in class under exam conditions. Learners will be asked to analyse a computing problem, design and implement a solution, and produce a short report on how you tested it. <p>Homework</p> <p>Homework will be issued regularly and will include the completion of class work and formal questions on the topic being covered in class.</p> <p>Homework will also be given in preparation for tests and exams.</p> <p>Useful Information/Resources</p> <p>Pupils will have access to all resources via the class Team and OneNote.</p> <p>Scholar materials on Heriot Watt's online learning programme is very useful as well as BBC Bitesize.</p> <p>This course encourages pupils to think creatively about the range of technology that is currently part of their lives and to gain a deeper understanding of "how it works" instead of "how to use it".</p>

Senior Phase and Beyond
<p>In S5/6 pupils can progress to Higher Computing Science or NPAs in Data Science or Digital Media. We also offer Advanced Higher Computing Science in S6.</p> <p>Computing science is vital to everyday life – on social, technological and economic levels. It shapes the world in which we live and its future. Computing is embedded in the world around us, from systems and devices in our homes to our places of work. It has also changed the way we learn, relax, travel and communicate.</p> <p>Learning computing science will give you many benefits apart from learning about technology. You will learn valuable transferable work and life skills, such as being able to solve problems in a logical way, think creatively and handle information.</p> <p>The skills you learn in this course are useful in lots of different job areas. These include science, communications, entertainment, education, business and industry. There is now a wide range of courses in colleges and universities related to Computer Science that provide progression for our pupils to use the skills learned in this course.</p>

CURRICULUM AREA

LEVELS

TECHNOLOGIES
DESIGN AND MANUFACTURE
NATIONAL 3, 4 AND 5

S3/S4 Course Content	Assessment
<p>The main aim of this course is to develop the learner's skills and creativity in designing a product towards a manufacturing process. Learners will then develop an appreciation and application of the properties and uses of materials.</p> <p><u>National 3.</u></p> <p>There are no discrete classes at National 3 level.</p> <p>There are three units of study in this course.</p> <ol style="list-style-type: none"> Design Using a given brief learners will Develop it to a final concept, generating ideas by applying research, graphics and modelling techniques. Material and Manufacture Learners will manufacture models and prototypes, applying a range of practical skills. The learner will also examine and evaluate existing products and develop an understanding of the impact design and manufacture has on our environment and society. Design and Manufacture Assignment As detailed in the Assessment section. <p><u>National 4</u></p> <p>There are no discrete classes at National 4 level. However, this level of qualification will be available for pupils who do not attain National 5 level.</p>	<p>Learners will be assessed internally during all units. It should be noted that there is no final practical exam in Design and Manufacture. Learners will complete a Design and Manufacture Assignment during class time worth 55% of the overall course award.</p> <p>The final 45% of marks, for National 5 only, come in the form of a written exam. All pupils will follow the same course and presentation level (at National 4 or 5) will be decided towards the end of S4. Note there is no written exam for National 4</p> <p>Homework</p> <p>Homework will be given on a regular basis. Learners will be provided with revision material and expected to use these materials for unit tests.</p> <p>Useful Information/ Resources</p> <p>We have a range of exemplar material in the form of former learners' design work and literature to accompany the course both in the department and library.</p> <p>We also have drop in sessions at the end of each day Monday to Thursday for pupils to catch up on or reinforce their learning.</p>
Senior Phase and Beyond	
<p>Design and Manufacture is offered at Higher level and Advanced Higher, possible career routes include: Product Design, Interior Design, Engineering, Manufacturing, Construction</p>

TECHNOLOGIES
ENGINEERING SCIENCE
NATIONAL 3, 4 AND 5

S3/S4 Course Content	Assessment
<p><u>Course Information</u> The main aims of the course are to enable learners to apply knowledge and understanding of key engineering facts and ideas and to understand the relationships between engineering, mathematics and science.</p> <p><u>National 4</u> There are no discrete classes at National 4 level. However, this level of qualification will be available for pupils who do not attain National 5 level.</p> <p><u>Additional Information</u> There are three units of study in this course.</p> <p>Mechanisms and Structures Using a given brief learners will develop it to a final concept, generating ideas by applying research, graphics and modelling techniques.</p> <p>Electronics and control Learners will manufacture models and prototypes, applying a range of practical skills. The learner will also examine and evaluate existing products and develop an understanding of the impact design and manufacture has on our environment and society.</p> <p>Context and Challenges Investigate engineered objects and engineering challenges and relate these to engineering concepts.</p>	<p>Learners will be assessed internally during all units. It should be noted that there is no final practical exam in Engineering Science. Currently 100% of marks for National 5 come in the form of a written exam. An assignment may be reintroduced to the course in the near future. All pupils will follow the same course and presentation level (National 4 or 5) will be decided towards the end of S4. Note there is no written exam for National 4</p> <p><u>Homework</u> Homework will be given on a regular basis. Learners will be provided with revision material and expected to use these materials for unit tests.</p> <p><u>Useful Information/ Resources</u> We have access to low voltage supplies and compressed air to allow learners to complete electronic and pneumatics tasks. We have appropriate software for simulation tasks and a range of exemplar material in the form of former learners' design work and literature to accompany the course.</p> <p>We also have drop in sessions at the end of each day Monday to Thursday for pupils to catch up on or reinforce their learning.</p>
<p><u>Senior Phase and Beyond</u> Engineering Science is offered at Higher level and possible career routes include: Mechanical, Structural, Civil, Electrical, Production, Marine and Electronic engineering.</p>	

S3/S4 Course Content	Assessment
<p>The main aim of this course is to develop the learner's skills in 2D and 3D graphics, as well as pictorial graphics. They will be able to apply these skills to produce graphics that require visual impact and graphics that transmit information.</p> <p>There are two units of study in this course.</p> <ol style="list-style-type: none"> 1. 2D Graphic communication. This unit helps learners develop their creativity and skills within a 2D graphic communication context. It will allow learners to initiate, develop and communicate ideas using graphic techniques in straightforward and familiar contexts. In addition, the unit allows learners to develop skills in some less familiar or new contexts and 2D spatial awareness. 2. 3D Graphic Communication. This unit helps learners develop their creativity and skills within a 3D graphic communication context. Again, it will allow learners to initiate, develop and communicate ideas using graphic techniques in straightforward and familiar contexts. In addition, the unit allows learners to develop skills in some less familiar or new contexts and 3D spatial awareness. <p><u>National 4</u></p> <p>There are no discrete classes at National 4 level. However, this level of qualification will be available for pupils who do not attain National 5 level.</p>	<p>Learners will be continually assessed internally during all units. It should be noted that there is no final practical exam in Graphic Communication. There is an assignment which is completed in class and which is worth 40% of the overall course grade. The remaining 60% is in the form of a final exam at National 5 Level. There is no final exam for National 4.</p>
	<p>Homework</p> <p>Homework will be given on a regular basis. Learners will be provided with revision material and expected to use these materials for unit tests.</p>
	<p>Useful Information/ Resources</p> <p>We have a computer suite with appropriate software to allow learners to complete tasks necessary for the course. For example, desktop publisher and Inventor. We also have a fully equipped drawing room and access to appropriate literature that goes along with this course.</p> <p>A homework/revision class is available Monday to Thursday after school to allow learners to catch up or reinforce their learning.</p>

Senior Phase and Beyond
<p>Graphic Communication is offered at Higher level and possible career routes include: Product Design, Interior Design, Architecture, Graphic and Multi-media design, Web design, Video game design, Printing and publishing, Packaging and so on.</p>

S3/S4 Course Content	Assessment
<p>This course develops skills in three main areas. Each area provides opportunities for learners to understand safe working practices, sustainability issues, and good practice in recycling within a workshop environment. Each area of study covers a different set of woodworking skills. All areas include skills and associated knowledge in measuring, marking out, cutting and jointing techniques.</p> <p>The three areas of study are:</p> <p>Flat-frame construction Learners develop skills, knowledge and understanding in the use of woodworking tools and in making woodworking joints and assemblies commonly used in flat-frame joinery, involving complex features.</p> <p>Carcase construction Learners develop skills, knowledge and understanding in the use of woodworking tools and in making woodworking joints and assemblies commonly used in carcase construction, involving complex features. This may include working with manufactured board or with frames and panels.</p> <p>Machining and finishing Learners develop skills, knowledge and understanding in using machine and power tools. Candidates also develop skills in a variety of woodworking surface preparations and finishing techniques</p> <p>National 3 This level of qualification will be available for pupils who do not attain National 4.</p>	<p>Course assessment structure:</p> <p>SQA Question Paper The question paper has 60 marks out of a total of 130 marks. This is scaled by SQA to represent 30% of the overall marks for the course assessment.</p> <p>SQA Practical Activity The practical activity has 70 marks out of a total of 130 marks. This is scaled by SQA to represent 70% of the overall marks for the course assessment.</p>
	<p>Homework Homework will be issued to reinforce the theory from class. Learners will be provided with revision material and expected to use these materials for tests.</p>
	<p>Useful Information/ Resources</p> <p>Learners will be able to utilise a modern workshop which is well kitted out with a wide variety of machinery and power tools enabling them to complete tasks necessary for the course and to experience a realistic workshop environment.</p> <p>Learners will have access to appropriate literature that goes along with this course.</p> <p>A homework/revision class is available Monday to Thursday after school to allow learners to catch up or reinforce their learning.</p>

Senior Phase and Beyond
<p>Practical woodwork is currently offered up to N5 level, but possible progression routes include: National Certificate Group Awards (NCGAs), a range of other practical technological courses at National 5, Skills for Work and sector-specific SQA qualifications, Furniture designer, Cabinet Maker, Carpenter or joiner, Construction operative, Musical instrument maker/repairer, Prop maker, set designer, Picture framer, Shop fitter, Wood machinist etc.</p>

S3/S4 Course Content	Assessment
<p>This is an exciting but demanding practical course that enables learners to develop precise practical skills and knowledge whilst supporting personal and social development that prepares learners for further training and employment in a wide range of careers. The course contains a significant amount of practical cookery supported by pertinent and related theory that builds essential knowledge and understanding.</p> <p>Cookery Skills, Techniques and Processes This unit aims to enhance learner's practical cookery skills, food preparation techniques and their ability to follow cookery processes in a practical setting. Learners must always also develop an understanding of importance of safety and hygiene and the ability to follow safe and hygienic practices.</p> <p>Understanding and Using Ingredients This unit aims to enhance learner's knowledge and understanding and the characteristics of ingredients from a variety of sources. It also addresses the importance of sustainability, responsible sourcing of ingredients and of current dietary advice. Pupils will develop the ability to select and use a range of appropriate ingredients in the preparation of dishes in a safe and hygienic manner.</p> <p>Organisational Skills for Cooking This unit aims to extend learners planning, organisational and time management skills, they will develop the ability to follow recipes; to create detailed and logical time plans, produce and cost dishes and meals and to work safely and hygienically. Learners will also extend their ability to carry out evaluations of a product.</p>	<p>At National 4, practical skills will be assessed throughout the course. Pupils will complete an added-value assignment which will require application of knowledge and skills from all units. This will involve developing, planning, manufacturing and evaluating a recipe supplied by the SQA.</p> <p>At National 5, The learner will be assessed by a practical activity drawing on the knowledge, understanding and skills developed across the Course. The coursework assessment consists of a practical activity (100 marks – worth 75%) where learners will plan, prepare and cook a three-course meal for a given number of people within 2 hours 30 minutes and present it appropriately. There is also a 1-hour question paper (30 marks – worth 25%); the course is graded A – D.</p> <p>Homework Pupils will have targeted assignments to deepen skills and knowledge around course content and SQA assignments. Pupils should aim to develop precise practical skills through preparing and cooking food at home. Homework will be issued to reinforce the theory from class otherwise, pupils are expected to take responsibility for their learning and look over their work each week. This consolidation work is supported by resources available on class team's pages and course notes. Prior to examinations, we also support and encourage pupils to practise exam technique using past papers from the SQA website and revision materials provided.</p> <p>Useful Information/Resources Pupils are expected to be suitably dressed in terms of health and safety.</p> <p>https://www.sqa.org.uk/sqa/47439.html https://www.bbc.com/bitesize/subjects/zhtsr82</p>

Senior Phase and Beyond
<p>Progression Route: National 5 and Higher Health & Food Technology. NPA in Bakery in S5.</p> <p>Careers: Hospitality industry, event management, food technologist, advertising, retail, environmental health, food stylist and photographer trading standards, food product testing, food science, teaching, and lecturing.</p>

LEVELS

TECHNOLOGIES
HEALTH AND FOOD TECHNOLOGY
NATIONAL 3, 4 AND 5

S3/S4 Course Content	Assessment
<p>This is a practical course which focuses on health, food preparation, nutrition and safe and hygienic practices in the kitchen. This course is suitable for pupils who have an interest in food, health, lifestyle and consumer issues and who enjoy learning through practical activity. Pupils will develop a range of skills which will allow them to work independently and collaboratively. These are transferable skills both to the senior school and to the workplace.</p> <p>This course consists of 3 areas of study.</p> <ul style="list-style-type: none"> • Food for Health Pupils will develop their food preparation skills and techniques and develop knowledge of health, food, nutrition and dietary needs. • Food Product Development Pupils will gain an understanding of the stages involved in the creation of a new food product and will use their practical skills to develop, plan and manufacture a food product to meet specified needs. • Contemporary Food Issues Pupils will cultivate a knowledge and understanding of contemporary issues affecting food choice such as technological developments in the food industry. Through practical food activities, pupils will be encouraged to promote positive healthy lifestyles. <p>National 3</p> <p>There are no discrete classes at National 3 level. However, this level of qualification will be available for pupils who are currently working at that level.</p>	<p>At National 4 skills and knowledge will be assessed throughout the course. Pupils will complete an added-value assignment which will require application of knowledge and skills from all units. Pupils will develop a product from a given brief.</p> <p>At National 5 skills and knowledge will be assessed throughout the course. Pupils will complete an externally assessed assignment which is worth 60 marks and undertake final exams which is also worth 60 marks, each carries a 50% tariff towards a final grade.</p>
	Homework
	<p>Homework will be issued to reinforce the theory from class otherwise, pupils are expected to take responsibility for their learning and look over their work each week.</p> <p>This consolidation work is supported by resources available on class team's pages and course notes.</p> <p>Prior to examinations, we also support and encourage pupils to practise exam technique using past papers from the SQA website and revision materials provided.</p>
