S1-6 Global Goal of the Week: The island city-state of Singapore is among the most nature friendly in the world. A number of high-rise apartments, office buildings, and hotels have installed green roofs and indoor hanging gardens to help reduce the effects of urban heat island (wherein a metropolitan area is warmer than its surroundings because of escalated human activity). While the city grew in population by some 2 million between 1986 and 2007, percentage of the island in green area actually increased as well, from 36% to 47%. (biophiliccities.org)

The design should be completed digitally.

- The Boroughmuir logo
- Anything else you want to include!

Please email to Mr Bird (Tom.2.Bird@boroughmuir.edin.sch.uk) with your name and reg class by the 26th of April. Good luck!
