S2-6 Global Goal of the Week: The number of people affected by **hunger globally** rose to as many as 828 million in 2021. South Sudan is facing a confluence of humanitarian crises that are pushing the country to the brink of starvation. Hunger in Scotland revealed that a staggering 1.2 million people in Scotland experienced food insecurity in the past year. Food insecurity is defined as 'the condition of not having access to sufficient food, or food of an adequate quality, to meet one's basic needs', and over a million people in Scotland suffer from this. We must do more to address these problems
